ARCHITECT
and INTERIORS INDIA

As a curator of extraordinary lighting masterpieces that fuse artistic expression with refined functionality, IDS continues to redefine elegance by presenting cutting-edge designs.

Inspired by the celestial majesty of the night sky, Starcloud is a mesmerizing composition of light and form. The collection's pendants—Atria, Lyra, and Vega—float effortlessly, each evoking abstract celestial bodies. Their intricate optical effects shift with the viewer's perspective, conjuring a captivating dance of light akin to stars waxing and waning in the firmament. Suspended on fine coaxial cables, these luminaries are available in three exquisite opaline glass finishes: opaque, pearl pink, and pearl grey. Offered in six meticulously curated arrangements or customizable configurations, Starcloud invites connoisseurs to craft bespoke lighting compositions that embody their personal aesthetic.

This collection transforms any space into a sanctuary of light and serenity. Whether gracing a grand living room, an intimate dining area, or a striking entryway, the Starcloud pendants elevate interiors with a seamless blend of artistic sophistication and modernity. Their versatility and timeless elegance ensure that Starcloud serves as a statement piece in both residential and commercial settings, infusing each environment with an air of celestial grandeur.

About Innovative Design Studio

Innovative Design Studio (IDS) from Innovative Design Group, founded by Vikram Jain, curates an exclusive selection of lights that resonate with true connoisseurs of design. Collaborating with globally renowned brands that redefine elegance, IDS, with Aryaman Jain at the helm as the CEO takes pride in crafting brilliance fusing art and technology and bringing innovative and awe-inspiring lighting solutions.
